

At 60 cups a day, you get through about 13 kg of coffee a month.

That is 6 kg a fortnight. Here is what it costs on each of our plans, where your money goes, and what we measure.

Three ways to run your coffee

ROAST IT YOURSELF

Your own roaster

A Mikafi roaster at your site. We send green coffee and your profiles; you roast what you need, when you need it.

£300 deposit

By card, refundable within 30 days. Then we look at your space, power and volume, and quote for your site.

Roast from our range of green coffees. On-site roasting electricity is your Scope 2, measured roast by roast.

Wholesale

Our Brazil Eagle Monte Carmelo (Cafe Delas), roasted to order on our smokeless, ventless electric roasters in York, and delivered.

12p a cup

£175.50 a month on a year's supply paid upfront

A year, paid upfront £13.50/kg

A year, paid monthly £16.20/kg

One delivery £18.00/kg

Wholesale and equipment

The same coffee, plus the machine, the grinder and the service.

We quote for the equipment your 60 cups a day needs, with your coffee at 12p a cup on top.

Monthly for limited companies and LLPs. Anyone can buy outright.

See where your money goes

Producer	Not disclosed by the importer
Shipping and import	30%
Roasting and delivery	45%
Service and support	25%

Shares of the price of our Brazil Eagle Monte Carmelo (Cafe Delas), to the nearest 5%.

A cup on a year's supply

Espresso (18 g)	24p
French press (14 g)	19p
Moka pot (9 g)	12p

Measured from the UK port to your cup

UK port

Green coffee lands. Our measurement starts here.

Roasted in York

Each batch: kWh used times the grid for that half-hour.

Delivered

Distance and vehicle, from a published factor.

Your cup

In your Scope 3 report, every figure with its source.
